WHEAT OUTLOOK

Production by variety was impacted by drought and a couple of freezing temperature events. These conditions varied from area to area, and in some cases, field by field. Despite all of that we have a good supply to offer to our wheat growing customers. Here is a rough estimate of the wheat varieties and availability:

VARIETY	Est. Supply	VARIETY	Est Supply
WB4401	Excellent	WB4422	V Good
WB4699	V Good	WB4523	V Good
SY Wolverine	V Good	SY Monument	Good
KS Providence	Ltd-Fair	WB Grainfield	Good
WB4269	Ltd-Fair	AP Bigfoot	Good
AP Prolific	Good	AG Radical	Good
Bob Dole	Ltd-Fair	AP18AX	Limited
KS Ahearn	Fair-Good		

Looking to spread production risk? Check out our Wheat BLENDS, which have three (3) top components. Here are the blends being offered:

CORN BURNER	REGULATOR	OUTLAW
WB4269	WB4401	SY Wolverine
AG Radical	AP Bigfoot	WB4401
AP Prolific	WB4699	WB4422

CUSTOM WHEAT CLEANING & TREATING

Wheat cleaning and treating services will be offered this wheat planting season. It's critically important that anyone wanting this done to call in to your respective Phillips Seed Farms office to get placed on the list. Clients looking to clean wheat typically go with the aspirated cleaner option. If a more thorough cleaning is required, we also have an indent cleaner and for the toughest scenarios, we have gravity table cleaning. The gravity table cleaning is only offered at Hope and Assaria facilities, whereas the aspirated cleaner and indent cleaning options are at all three locations.

WHEAT IS SELLING FAST! CALL TO ORDER SOON!

FALL PLANTING ALFALFA

Fall planting is coming up! It's best to keep a firm seed bed and planting depth from 1/4" to 1/2" for best stand establishment. Phillips Seed Farms' **Shuttle EQ²** variety has become our best selling variety, but we also offer the Shuttle II and Value Plus varieties. Give us a call.

Shuttle EQ² alfalfa variety is pictured at left, and shows regrowth after first planting and first cutting.

PRODUCT SPOTLIGHT: PS1372 TRE

PS1372 TRE continues its rise on the corn hybrid popularity list. This 113-day TRECEPTA hybrid is stacking up whole field and plot results in impressive fashion. It's being planted from northern NE to OK and MO to IA. It's shown adaptability to all soil types; dryland to irrigated. Can also be used as a silage option.

Maturity (RM):	113 Days
Yield Potential:	Excellent
