WHEAT PLANTING & AVAILABILITY

Wheat planting is well underway and wheat seed is being shipped out at a high rate as growers are working with recent, but spotty rains to get the crop started. As decisions are finalized there is still wheat seed available and a quick chat with your sales rep or local PSF office will provide the latest availability.

Variety	Status	Variety	Status
KS Ahearn	Limited	AG Radical	Ltd-Fair

TWO PSF MILO HYBRIDS IN KS REPLICATED TRIAL:

Top picture is 5883C, and 637 is pictured below.

5883C – 58-day late plant/double crop option in central KS, early plant in NW KS. Cream color grain

637 – 63-day popular bronze color grain with strong record of performance in central KS

PSF OPERATIONS AT WORK: WHEAT SEASON!

PRODUCT SPOTLIGHT: PS1063 VPR

This new 110-day hybrid is showing up in strip plots this fall. We're beginning to see what we saw in earlier replicated trials. It yields and dries down well.

Maturity (RM):	110 Days
Yield Potential:	Excellent
Drought Tolerance:	Very Good
Plant Height/EarType:	Medium/Semi-Flex
Test Weight:	Average/Good
Drydown for RM:	Excellent for RM
Early Plant Vigor:	Good
Late Season Intactness:	Good
Corn After Corn:	Very Good
Gray Leaf Spot Resistance:	Very Good
Goss's Wilt Resistance:	Very Good
Northern Corn Leaf Blight:	Very Good

PS 1063 VPR

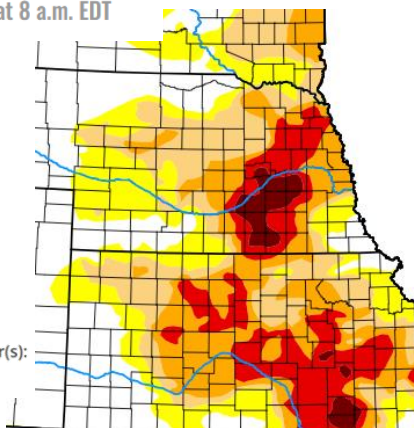

DROUGHT MONITORING

Map released: Thurs. September 28, 2023

Data valid: September 26, 2023 at 8 a.m. EDT

Intensity

None
D0 (Abnormally Dry)
D1 (Moderate Drought)
D2 (Severe Drought)
D3 (Extreme Drought)
D4 (Exceptional Drought)
No Data
